

Broadcaster

For Bell 47 and Bell Soloy Helicopters

Isolair offers the Broadcaster, systems that look and perform like an integral part of your aircraft. The Broadcaster brings enhanced control and productivity to dry application with its advanced design and operational features.

The reliable Bell 47 continues to find life as an application workhorse around the world. The Isolair 4500 series system has been proven and well accepted on standard and modified craft.

The pilot gains full cyclic control and read-out of level, gate position and pressure. Infinite metering is available from either or both hoppers for instant swath width control. Blowers are designed to distribute granular material intact, with a minimum of breakage.

The system features the user-oriented innovations and quality USA manufacturing that make Isolair the favorite of pilots and application managers.

Dual independent blowers

allow full or half swath, instantly.

Convenient dual hoppers

for fast, efficient loading.

Aerodynamic design

gives improved performance and confidence.

Micro adjust metering

allows infinite flow rates.

Air operated metering gates

for instantaneous response.

Cyclic control

gives pilot full cockpit control and readout.
