

4600-S61 Eliminator II

For Sikorsky S61 A & N Model Helicopters

STC No. SR0185SE

System Components

Tank Assembly: External Fiberglass tank mounted to external hardpoints, with internal FSC tanks

Dump Doors: Electrically actuated, hydraulic operated. Fail safe doors will open with loss of electrical power.

Collective Control/Display Unit: Allows pilot to control dump volume, and drop length. Digital readout of tank contents for easy monitoring..

Specifications

Tank assembly height.....39 in.

Tank assembly width.....131 in.

Tank assembly length..... 112 in.

Net Weight.....792 lb.

System capacity.....1000 U.S. gal

Power Requirements.....24VDC, 20amp

**ISOLAIR ELIMINATOR II
MODEL 4600-S61 HELICOPTER FIREFIGHTING SYSTEM**

4600-S61 Eliminator II

For Sikorsky S61 A & N Model Helicopters

STC No. SR0185SE

Isolair Eliminator II systems are a revolutionary advance in fire fighting for the Sikorsky S61 series helicopters. Rapid cycle times and lower hourly costs will result in significant savings over larger fire fighting aircraft.

The Eliminator II fire fighting systems have been proven in service worldwide. Its in-flight features offer faster fire fighting cycles; loading, dump volume and drop length are precisely controlled and monitored in the cockpit. Collective mounted controls provide ease of system operation and reduced pilot workload. The systems low profile and excellent aerodynamics will not diminish flight characteristics.

Isolair Inc. is proud to provide products that feature user-orientated innovations and quality USA parts

LIGHT WEIGHT:

Low system weight allows higher payload

EASY INSTALLATION:

Rapid, two person installation

SAFETY AND CONTROL:

Aerodynamics, allows normal control

CONTROLLABLE DUMP VOLUME:

Pilot can select 1 or 2 doors!

CONTROLLABLE DROP LENGTH:

Select drop length for given airspeed
